Facilities

Our primary facility houses 58,000 square feet of space available for warehousing and distribution operations. Of the 58,000 square feet, 22,500 square feet is racked three tiers high, yielding additional storing capabilities. We also have an 88,000 square foot warehouse (within the same gated complex) which 44,000 square feet of floor space is also available for warehousing and distribution.

Warehousing Services

Cargo Consolidation Services, Inc. has the facilities and resources to satisfy your import warehousing and distribution needs. Using state of the art facilities and systems enable us to perform total supply chain solutions to our clients. Inbound receipt of imported product, inventory control, statistical inspections, assembly (when required), order fulfillment and distribution of sold orders make Cargo Consolidation your total supply chain partner.

We offer our warehousing customers RF real time inventory that can be viewed by our customer 24/7 via a secured link to our inventory management system. We have customized barcode scanning with weekly cycle counts that ensures accurate inventory control and distribution.

Cargo Consolidation Services, Inc. also offers an in-house full service inspect, repair, and repack operation for touchup on imports. Our repair staff has more than 20 years of experience in repair, restoration, and parts fabrication. Their expertise also includes antiques, metal, stone/marble, mirror/glass, leather, and cast finishes as well. We have the ability to complete light assembly projects or put together a light assembly operation that will benefit our customer in reducing their overall overhead cost.

Being an agent for Home Direct, USA, we can assist in making residential deliveries to your end consumers anywhere in the United States or Canada.

Security / Asset Protection

Our facilities are protected and monitored by a UL approved monitoring station. Facilities are equipped with door sensors, motion detectors, glass breakage sensors, and fire alarms. Entrance gates, yard, and our import warehouse are protected by video cameras that are recording at all times. All of the warehouse and office space are equipped with a dry sprinkler system that is remotely monitored. Police/Fire Department and company management are immediately notified any time the system is activated.

Gate access to the property is controlled by individual access code or proximity card utilizing GE Security's Secure Perfect Access Control System and is updated immediately as changes are made.

Our surveillance equipment consists of 20+ cameras strategically placed throughout the facility and grounds. The video is digitally stored and remotely monitored. This system runs continuously 24/7 with the capability of nine days of storage capacity.
